

Networks are of ever growing importance to successful work in Europe. They provide invaluable assistance in understanding processes and increasingly offer strategic routes to improving efficiency. To work effectively in Europe, it is vital to have an understanding of the ins and outs of the networking maze.

Why a book on EU networks? The success of the book *Lobbying in Brussels – a practical guide to the European Union for cities, regions and enterprises* (2006), demonstrated the intrinsic link that exists between networks, networking and successful lobbying in Europe in particular for regional and local actors.

What is a network? What is networking? How are networks structured? How do they work with European institutions? What role do they play in Brussels? What added value can be gained from operating within a network at EU level? What are the risks? What can be gained? This book seeks to provide pragmatic answers to these questions and more to all people getting involved in lobbying and networking in European affairs.

Pascal Goergen was born in Cologne in 1963 and lives in Belgium with his 3 children. With a background in Germanic studies, he holds a doctorate in Political Science, a diploma in International Relations and has taught courses in languages and European institutions at a specialist marketing institute in Brussels during 10 years.

A self confessed Europhile with specialist knowledge of regional policy and lobbying, he is the author of *Vous avez dit Europe?* (1999), and *Lobbying in Brussels* (2006).

Pascal Goergen has been the Diplomatic Representative of the Brussels-Capital Region to the EU since 2000 where he previously acted as the Belgian spokesman within the research group of the European Council during the Belgian Presidency and currently oversees regional policy, competitiveness and Euro-Mediterranean partnership.
